

DADE DAUD YUSUP

SOFTWARE ENGINEER

Summary

I view a programming not merely as a profession, but as a space for continuous exploration and growth. My experience spans SaaS scalability, Financial Products, Smart Contract & IoT integrations. These diverse challenges have shaped a systemic mindset in designing reliable and efficient digital architectures. I focus on building solutions that are not only technically robust but also relevant and sustainable for business.

Education

2016 - 2020

STIE PARIPURNA

Completed non regular class education and earned a Bachelor's degree in Economic with a Cumulative Grade Point Average (CGPA) of 3.00. The thesis was titled "The Influence of Financial Technology on Improving Capital Access for Micro, Small, and Medium Enterprises."

2020 - 2022

OXFORD HOME STUDY COLLEGE

Completed a program Oxford Home Study College focusing on Cyber Security.

Language

English
Indonesia

Skills

Problem Solving
Critical Thinking
Attention to Detail
Lead
Mentoring
Collaboration
Communication
Adaptability
Creativity

Frequently Used Tools

Frontend Development

Nextjs	React Native	Zustand	Frammer
Reactjs	Redux	Tailwind	GSAP
Vitejs	Zustand	Shadcn	Threejs

Backend Development

Expressjs	JRPC	Postgre	Graphql
Django	GRPC	Mongodb	Redis
Flask	Graphql	Firebase	Rabbitmq

Internet of Things

ESP32	MQTT	Lorawan
Arduino	Zigbee	COAP
Raspberry	Node Red	R-CNN

Web3 & Artificial Intelligent

Hardhat	Alchemy	Fine tuning
Wagmi	Infura	RAG
Ethersjs	VectorDB	Transformers

Others

Git	Linux	Serverless
Docker	CI/CD	Grafana
Kubernetes	Agile & Scrum	Sentry

Recently Work Experience

Espro Excelindo

Feb 2025 - Currently

Technical Lead

Led a cross functional engineering team in designing and maintaining scalable backend systems for ISP network services, including device provisioning, subscriber management, and billing integration, while bridging network infrastructure such as routers, OLT/ONU, and switches with software platforms to enable automated service activation and monitoring; directed system architecture and technical decisions to ensure high availability, performance, and scalability, enforced software engineering best practices, and collaborated closely with network engineers, product teams, and business stakeholders to translate requirements into efficient, reliable solutions while mentoring team members and driving continuous improvement.

Other Work Experience

Jun 2024 - Jan 2025

Freelancer Cross Industry

Andlaw
Auronex
Goldium
Workcrud
Yummycorp

Software Engineer

Developed diverse responsive web applications and robust backend APIs across multiple industries, adapting to a wide range of technologies, frameworks, and client requirements while ensuring seamless integration between frontend and backend systems; implemented scalable architectures, optimized application performance, and maintained code quality through best practices, testing, and documentation, consistently delivering reliable, high quality solutions within managed timelines and collaborating effectively with cross functional teams to meet business objectives.

Dec 2023 - May 2024

Adira Dinamika Multifinance

Software Engineer

Developed and maintained software systems to streamline multifinance operations such as loan processing, risk assessment, and credit scoring, optimized application performance and scalability to handle high volumes of transactions, and ensured compliance with industry regulations while implementing robust security measures to safeguard sensitive financial data.

Apr 2023 - Oct 2023

Teknologi Karya Digital Nusa

Software Engineer

Designed and deployed IoT solutions tailored to client requirements across industries such as logistics, transportation, manufacturing, and smart cities, developed and configured IoT devices to communicate with cloud based platforms for real time monitoring and data analytics, and troubleshoot and resolved connectivity and performance issues to ensure reliable and efficient IoT deployments.

Jul 2021 - Apr 2023

Dedomena

Lead Frontend Engineer

Led a team of frontend developers in building modern ERP solutions, implemented scalable frontend systems to deliver seamless user experiences, collaborated closely with backend engineers to ensure reliable API integrations and data consistency, and reviewed and refined code to maintain high quality standards, performance, and accessibility.

Jul 2020 - Jun 2021

Qerja Manfaat Bangsa

Frontend Engineer

Developed interactive and user friendly interfaces for a job search and company review platform, ensured performance optimization, collaborated with designers to meet usability and accessibility standards, and conducted testing and debugging to maintain a seamless user experience across multiple devices and browsers.

Feb 2019 - Jul 2020

Sabre Travel Network

Software Engineer

Developed and maintained full stack features for an online travel booking platform, building responsive and dynamic user interfaces alongside robust backend services, optimized user experience by improving load times, system performance, and accessibility, collaborated with backend and frontend engineers to design and integrate APIs ensuring seamless functionality, and leveraged modern frameworks and technologies to deliver scalable, high performance solutions tailored for the travel industry.

Jan 2018 - Dec 2018

Prima Adhikarya

Software Engineer

Developed custom software solutions for diverse clients with a focus on scalability and reliability, participated in the full software development lifecycle including requirement gathering, design, coding, testing, and deployment, provided technical guidance and recommendations to optimize client IT infrastructure, and debugged and troubleshoot issues to ensure smooth system operation and ongoing maintenance.

Jan 2017 - Dec 2017

Care Indonesia Solusi

Software Engineer

Designed and developed software tools to enhance HR operations such as recruitment, performance evaluation, and employee engagement, collaborated with psychologists to build applications for psychological assessments including IST, MBTI, and Papi Kostick, and conducted system testing and user training to ensure successful implementation and adoption.

Jan 2016 - Dec 2016

Quadrant Boarding School

Software Engineer

Developed and maintained educational software to enhance the learning experience for students, parents, and teachers, implemented features for online learning, grading, and attendance management, collaborated with academic staff to align the platform with educational goals and standards, and troubleshoot issues while continuously improving system performance and reliability.
